Workmanship	The recommendations of good practice made in the relevant British or European Standards regarding design and workmanship must be fully observed. Always mix from at least 3 packs, working diagonally down the blades, not horizontally across the tops of packs. Bricks & brickwork should be covered during construction to prevent saturation.				
Performance	All Northcot 1st quality bricks are Frost Resistant. Northcot Bricks are manufactured to F2 rating for Frost Resistance as described in BS EN 771-1: 2011 "Specification for Clay masonry units". The specification is for masonry (walling) products which are to be used in brickwork designed and built in accordance with recommendations in BS PD 6697: 2010 "Recommendations for the design of masonry structures to BS EN 1996-1-1 and BS EN 1996-2". The use of Sulphate Resisting Cement is recommended. Further details on website				
Samples	Usually within 48-hour dispatch				
Important Advice	Colours and textures reproduced here are as accurate as the printing process allows and final choices should not be made from this brochure in isolation. For the latest updates on technical information, please visit our website on www.northcotbrick.co.uk				

Northcot's staff are committed to providing a flexible, prompt and courteous service. The Sales Office has more than 30 years experience and knows all there is to know about Northcot bricks. We also have experienced representatives available to advise and offer guidance when required. Our 48-hour sample despatch service is available, providing either 3 or 5 brick packs or slip-panels. Sixty brick site panels can be produced for local planning and/or conservation departments on your behalf.
